Project vertices

- Project overview and filter
- ToDo list
- Checklist workflow
- Milestone release
- Critical change
- Multiproject management cockpit

Project activities

The project-specific key points represent every single step of a project

Functions:

- Display a list of all project points active in this project
- Display of a detailed description of a project item by clicking on the number or the name
- In the detail view of the project vertices, detailed data and applied standards are given
- Corner points can be deactivated (=i.e. hidden), they will then no longer appear in the checklist and map of the team meetings
- From existing functions, active / inactive profiles can be transferred to existing projects
- The effort and the supporting roles can be edited at project points

Details and additional information by clicking on the key point names

Shows if the key points are active or inactive

NO.	KEYPOINT TITLE	RESPONSIBLE FOR EXECUTION	PROJECT STAGE	ACTIVE	CHECKLIST
